Bridging Education Gaps in Ukraine:

CATCH-UP and STEAM Classes for Resilient Learning

The war has significantly impacted education in Ukraine, with a decline in performance comparable to **2 years** of missed school.

Around **4.6 million** children face barriers in learning, including 32% of all students in Ukraine studying in hybrid or remote formats*

*UNICEF Ukraine Annual Report 2024, Feb. 2025; Ukraine Fourth Rapid Damage and Needs Assessment RDNA4, Feb. 2025

OUR IMPACT GOALS

- Up to **400** students in the Catch-Up programme
- Up to **200** students in the STEAM programme
- Up to **40** teachers to select and train
- **5** subjects offered: Ukrainian, English, Math, History + STEM and Art

Focus on

Catch-Up

STEAM

Interim programme results

90% of students showed improved test results

Enjoyment of learning increased **2.0%→13.4%**

Anxiety and depressiveness decreased **17.7%→11.8%**

Sense of safety increased **60.5%→69.0%**

Confidence during lessons grew **5.4%→9.2%**

Peer connection and trust in teachers strengthened

Budget

The total project value is EUR 1 000 000

500 000 – Lithuania's allocation

500 000 – Taiwan's allocation

PROJECT IMPLEMENTER

Lithuanian International Partnerships Center | CPVA leads the project, drawing on extensive experience in educational infrastructure, institutional recovery, and capacity-building to ensure safe and effective learning environments.

PARTNERS IN UKRAINE

SavED is a key partner in the Catch-up and STEAM initiative. It is a charitable foundation that restores life in communities affected by war through educational, social, and infrastructure solutions. Within the project savED brings expertise in developing learning programmes, providing technical support, organising teacher training, curriculum adaptation, and monitoring the programme's impact to ensure it meets educational standards and student needs.

PARTNERS IN LITHUANIA

The **National Education Agency (NŠA)** updates general education programs, conducts achievement assessments, and leads national and international studies. NŠA contributes its STEM expertise by supporting Ukrainian partners in developing methodology and training teachers.

PROJECT'S LOCATION

The **rural community in the Odesa region** has been selected as the pilot site for the project. All activities take place in a newly built, dual-purpose underground shelter at the local Lyceum - a project funded by the European Union, Lithuania, Ireland, and implemented by LIPC | CPVA.
