Future School for Ukraine:

A Modern School and Community Centre in Zhytomyr

...Future School for Ukraine initiative provides a free-to-use architectural design. It is for new, modern and inclusive school to be built across the country.

Ursula Von Der Leyen
President of the European Commission

The full-scale russian invasion has destroyed over 400 educational institutions and damaged 4,500 more, according to the Ministry of Education and Science of Ukraine. This costs Ukraine's education sector an estimated US$13.9 billion (RDNA5).

The total project value
EUR 18 000 000

Co-funded by the European Union

About the project

The European Union, Lithuania, and Ireland have partnered to build the first school with the "Future School for Ukraine" adaptive design in Zhytomyr region, which was destroyed by russia in 2022. The "Future School for Ukraine" project, funded by Lithuania, supports the recovery of Ukraine's war-affected school system. It offers a free, ready-to-use adaptive design for building new schools. Selected through a global architectural competition, the design has now been fully developed and is ready to be adapted to specific locations.

Key deliverables

- Innovative school for **650** students
- Modern school shelter for **850** people
- Adapted school design + **localisation guide** for implementation across Ukraine

The project is a part of New European Bauhaus

SUSTAINABILITY
Integration of efficient construction methods and renewable energy solutions.

INCLUSIVITY
Indoor and outdoor hubs encouraging social interaction and collaboration among students, teachers, and all members of the community.

AESTHETICS
Human-centered design, colors, and materials to create an inspiring learning environment.

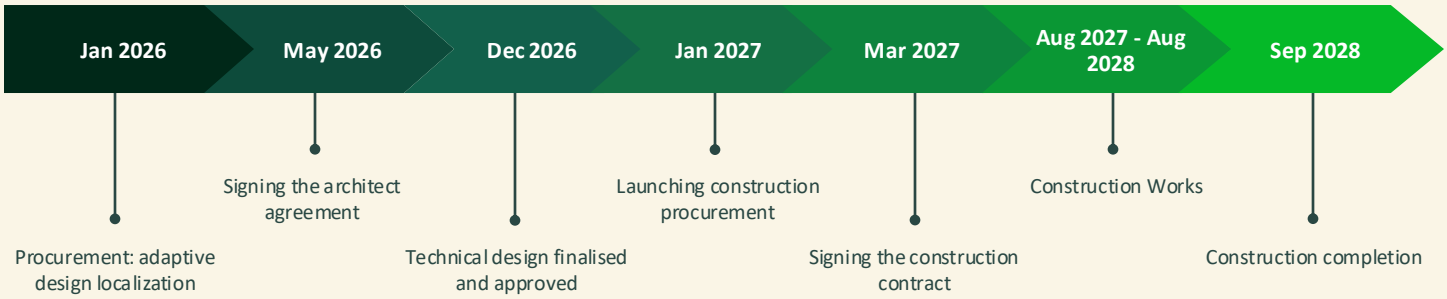

Project implementation

Lithuanian International Partnerships Center | CPVA is the project implementer. The Center manages Lithuania's and international strategic support programmes for Ukraine, delivering initiatives that combine infrastructure investments with institutional and human capital development. Its portfolio includes the reconstruction of educational infrastructure, veteran rehabilitation, demining, energy resilience, and public sector capacity-building programmes, providing extensive experience in implementing complex recovery and reconstruction projects.

Zhytomyr City Council, the project's main partner and beneficiary, will be responsible for the school's, ensuring both its construction and future operations directly benefit the local community.

Project timeline January 2026 – September 2028

Project innovative construction approach

- The project will use the adaptive Future School for Ukraine design and **serve as a model** for rebuilding modern, safe, and sustainable educational infrastructure across Ukraine.
- Building Information Modelling (**BIM**) will be used throughout the design and construction process to coordinate technical solutions, improve efficiency, and ensure high construction quality.
