# Strenght through care

## Rehabilitation and reintegration of veterans and victims of war

Ukraine's veteran population is expected to reach **≈ 6 million people**, with one in five Ukrainians potentially being a veteran or a member of a veteran's family. russia's war has left soldiers and civilians with complex physical injuries and psychological trauma, while rehabilitation needs far exceed the capacity of the pre-war system. Sustained investment in infrastructure, expertise, and services is essential for Ukraine's recovery.

Ukraine's veteran community must be fully integrated into public life, and veterans who see themselves as drivers of change indeed become one of the most reliable sources of strength for Ukraine after this war.

Address by President of Ukraine in International Veteran Forum
Volodymyr Zelenskyy
August 22, 2024

## Programmes Supporting Recovery and Reintegration

### Rehabilitation and Reintegration of Wounded and War Victims in Ukraine Programme

**2024 - 2027**

Lithuania's EUR 15.2 million programme strengthens rehabilitation and reintegration services. It enhances the capacity of rehabilitation system and delivers long-term support to help people return to active, independent lives.

**LIPC | CPVA implements the programme**.

**PROGRAMME COMPONENTS**

- **Development of rehabilitation services:** specialist training, improved treatment protocols, and operational excellence support from world-class experts.
- **Reconstruction of rehabilitation centre in Lviv region:** modern rehabilitation centre with 120 inpatient beds.
- **Reconstruction of rehabilitation centre in Dnipro region:** new spinal cord injury rehabilitation centre with 34 inpatient beds opened in October 2026.
- **Reconstruction rehabilitation centre in Zhytomyr region:** improving of rehabilitation facilities, including new indoor and outdoor therapy spaces and enhanced outpatient services.

### NATO Renovator Project

**2025-2028**

The project strengthens Ukraine's rehabilitation capacity through modern infrastructure, equipment, and training.

**LIPC | CPVA is one of NATO's executing Agents for the Renovator project.**

**PROJECT COMPONENTS**

Comprehensive support for a military medical rehabilitation centre, including:

- Capacity strengthening program for rehab specialists and hospital management
- Latest rehab equipment
- Reconstruction of infrastructure
- Creation of new physical and occupational therapy spaces, and accessibility.

Renovator is a NATO-led initiative involving Lithuania, Latvia, Norway, Sweden, and the UK, funded through the Comprehensive Assistance Package for Ukraine.

# What we aim for:

Better care → Faster recovery → Healthy society → Economic recovery

# Our ready-to-scale model

## Key components for every rehabilitation centre

**1 — Accessible and functional infrastructure**

- Creating modern, patient-centred rehabilitation facilities

**2 — Contemporary equipment**

- Evidence-based equipment solutions

**3 — International expertise for today's challenges:**

- Multidisciplinary team approach
- Integrated physical and mental health recovery

**4 — Improved management**

- Modern management, operational processes, and quality assurance

# Long-term focus:

## Sustainable system for long-term care

**Post-trauma care focus**

**Research and advocacy: Evidence-based system change**

**Local centres of rehabilitation excellence**

**Link between civil and military medical systems:**
Unified standards for quality of care

**Social and vocational reintegration:**
Dignified and economically independent life

## Partner with us to deliver visible results for Ukraine's recovery

**Proven capacity to deliver:**

- Extensive experience delivering complex healthcare and infrastructure projects
- Ready-to-scale training and rehabilitation system strengthening programmes
- EU pillar-assessed agency with transparent procurement systems
- Trusted partner of civilian and military healthcare institutions
- Strong network of international experts and Ukrainian partners
- Established relationships with national, regional, and local stakeholders

# Flexible Funding and Partnership Solutions

**Flexible forms of contribution**
Fund infrastructure, equipment, training, or other priority rehabilitation investments.

**Direct partnership**
Direct funding to rehabilitation investments that match your priorities and objectives.

**Public-Private partnerships**
Partner on high-impact rehabilitation initiatives with measurable outcomes.
